

2. Assembly of EZ Port MAX Easy-Lift Entry - 206033EX-**

Align the EZ Port MAX Easy-Lift Entry (206033EX-**) to an EZ Dock Port MAX Extension (206031PW-**) and couple together using two (2) EZ Dock Port to Port Coupler Kits (301208).

NOTE: The EZ Port MAX Extension and EZ Port MAX Easy-Lift Entry must be sitting level on the water and at the same elevation for the coupler to properly seat into the bottom pocket. This may require a counter balance weight toward the entry end of the EZ Port MAX Easy-Lift Entry to offset the weight of the installer who is standing at the seam between the EZ Port MAX Extension and the EZ Port MAX Easy-Lift Entry.

Warning: No walking surface on angled surface of EZ Port MAX Entry Extension!

Tools required:

- EZ Dock In-Water Installation Tool (900010)
- Ratchet and socket set
- Composite Coupler Installation Tool (900005)
- Screwdrivers (Phillips and standard)
- 15/16" or 24mm socket
- Pry-bar (small and large)
- Hammer

BILL OF MATERIAL			
ITEM	QTY.	PART NO.	DESCRIPTION
1	1	206031PW-**	EZ Port MAX Extension
2	2	301208	Port to Port Coupler Set
3	1	206033EX-**	EZ Port MAX Easy-Lift Entry
4	1	206025BS-**	Bow Section Full for EZ Port MAX

NOTE: Testing has also shown that some watercrafts and user preference resulted to water ballasting the entry (206033EX-**) with water (see EZ Launch Owners Manual). This is done by simply filling the entry with water to the desire level. This allows the watercraft an easier entry and even a more stable platform.
